# Executive Summery

Villiam Token (VLT) was co-founded by Villiam Inc. and Future Platform IT Sdn Bhd, in Kuala Lumpur (Malaysia) in 2018. The ([www.villiam.io](http://www.villiam.io)) business modern is sales and marketing trading platform to promoting modern market sales and marketing ecological chain. Through the online blockchain ticketing sales and offline dealers platform transactions, this not only reduces the printing costs, but also can verify the integrity of the tickets. VLT will also provide a series of dealer and user group feedback platforms with the VLP points system. Through the smart sales/payment system to obtain VLP points shopping discounts, this is a novel and valuable feature that makes VLT stand out from competitors.

The company plans to use VLT blockchain platform to quickly integrate customer groups and dealership business connections in a short period of one or two years, with a group of more than 10,000 or more companies, including Korean Plastic surgery industry, performing & arts, Chinese beauty Industry (more than 10,000), Malaysian Pharmaceuticals, Convenience Stores, Gold Stores, Resorts, Bird's Nest Wholesale City, etc.. Business cooperation negotiations have been completed so far. And in the future will promote the modern ecological chains to covers more and more countries.

As a leader in modern marketing and an expanding market, VLT intends to distribute sales and marketing tokens through pre-sales (ICO) which is a non-securitized cryptocurrency. VLT compliance with the ERC20 standard is managed through smart contracts deployed on the Ethereum blockchain. VLT is a practical crypto-currency that can be used to pay for services on the VLT website. VLT's ICO is different from other ICOs because it is based on an already viable and profitable business model. It also differs from other blockchain startups in that VLT already has an established business that goes beyond vision and planning. The business success of VLT is because It reduces transaction and search costs for buyers and sellers, and allows major sales and marketing leaders to share profits earned by sales and marketing merchants. VLT also plans to officially form an IPO in London, England, two years later.

# Team Strategy

Organization Task Management Table  
Villiam Token ( VLT- Ecological Blockchain Digital Currency )

- VLT- Sales and Marketing Platform in Blockchain Digital Currency
- VLT- Sales and Marketing for Blockchain Digital Currency Wallet

Villiam Point ( VLP - Sales and Marketing in Point)

- VLP- Sales and Marketing Platform in VL-Point
- VLP- Sales and Marketing for VL-Point Wallet

Villiam.io

Devoted to creating Asia top commercial links. Combine investment entities and technology finance industries to create profitable resources. Promoting sales and marketing to creating the member consumption network data to increase token circulation (ICO Initial Coin Offering)

Distribution of VLT payment networks can be used anywhere in the world where people can access the Internet. Global and open marketability have a huge advantage over international consumers and distributors compared to existing financial infrastructure.

- Digital Asset Information Platform
- Blockchain Technology and Technology Exchange Community
- Encrypted Digital Currency Research Blog
- Beginner Community Training Camp
- International cryptocurrency exchange platform

## Team Strategy

VLT- Business cooperation model

- Internet E-Purchase
- VLT Token Wallet Recognition
- VLP Member Point Recognition
- VLT Blockchain Token Ticketing
- Retail Channel (POS)
- In Store Purchase
- Purchase - ICO Listed

Team Strategy

- Build Asian Consumers & Dealers Online Trading( B2B / B2C )
- Unique and innovative blockchain ticketing system ( Blockchain Ticketing )
- Cross-border international, excellent online and offline shopping mall consumption
- Blockchain Wallet
- Promotion activities
- Settlement of ERC20 for Tourism Establishment of Digital Cryptocurrencies - Total Distribution (500 million)
- Opening of Malaysia company Headquarters and invitation to the Sarawak State (Province) YM Tengku Hishammuddin Zaizi participated in the launch of the first blockchain university in Asia.

Executive

- Win-win plan for consumers and distributors
- Business expansion
- Fair, Open, honest
- Promote social development

Leadership

- Customer-oriented service platform
- Courage to innovate and create a one-stop sales & marketing place

Business Strategy

Implementing business ideas, realizing basic business approaches and guiding business goals, answering questions and giving guidance for the cashless business era to promote business principles and policy planning.

# How is ERC20 Different ?

ERC20 Villiam Token – VLT digital currency used for public blockchain (Ethernet technology ETHER), encrypted digital monetization of venture projects, and these projects must be based on blockchain or distributed ledgers.

Promote ERC20 Token - Sales and marketing of blockchain digital currency  
Build a new generation of public blockchains, and use the public blockchain organization (Ether) operated by the global blockchain community consensus, co-construction, sharing, and to distribute their own digital currency to blockchain communities. Called a cryptocurrency token or coin

ERC20 Villiam Token - This practice of selling and marketing blockchains digital currency is called "ICO" Initial Coin Offering (public offering of token financing); ICO corresponds to "IPO": Public Offering (IPO financing). Blockchain community for compliance and legality In distinction with the IPO, there is also the ICO called "Initial Crypto - Token Offering".  
The ICO's name is indeed more in line with the essence of "ICO."

## Use of ERC20

9

Anyone can use this system without a license-ERC20 Villiam Token

- The development, operation, and application of this system adopt a decentralized, distributed, self-organizing community system;
- ERC20 Villiam Token - Sales and Marketing of Blockchain digital currency is a feature currency that requires a small amount of ERC20 Token when using ERC20 Villiam Token - a variety of applications for selling and marketing blockchains digital currency
- Can only be issued on behalf of ERC20 Token - Sales and marketing of blockchain digital currency to finance development projects to support ERC20 tokens.
- VLT announcements will only issue a total of 500 million tokens, of which 15% (75 million) will be issued publicly. The other will combine investment entities and technology finance industries to create profitable resource projects.
- All ERC20 Villiam Token - market share for sales and marketing of \$50 million USD worth of Ether, all deposited in multi-signature wallets. The wallet address is open and transparent and may be used only by signatures of multiple persons.
- ERC20 Token - The sales and marketing of encrypted digital currency can be traded on digital currency exchanges in the future.
- For those investors who are familiar with the initial issue of various "ICO" , they will usually quickly notice the unique characteristics of "Blockchain cryptocurrency".

VILLIAM

# VILLIAM BLOCKCHAIN TOKEN

# Villiam Token Wallet

## Core Technology

### Villiam Token Wallet

The Villiam Token- blockchain digital currency wallet will be offered first on computer PCs, first on WINDOW and MAC systems, before launching mobile applications that can be easily downloaded from APP STORE -Apple apps or Google Play Store. This launch will be released after ICO (end of sale). The Villiam Token blockchain digital currency wallet application will give you the freedom to easily manage your finances, transfer funds, buy or sell VLT or simply use to for online bill payment.

You also have access to some useful options, such as wallet reviews in the market, and you may even have the option to configure automatic transaction in VLT wallet options.

The ViLT wallet does not cover transaction costs, but must follow the ERC20 Ethereum mechanism and cost, and is completely secure. ViLT wallets can be used in Malaysia or anywhere in the world, for example, community members and partners. Members can buy or add credits on a VLT platform, and do not need to face the problems of traditional restraint.

VLT wallet will be the basic tool for your financial operations, which also includes all of our future products to be promoted.

## VILLIAM BLOCKCHAIN TOKEN

Milestone 1

Milestone 1:

VLT will expand its resale service to sell online or offline on the marketing platform. VLT provides sales and marketing for buyers through related ticketing departments and also ticketing feedback platform for buyers.

Targeted

Meet market demand for consumer groups.  
Increase the scope of payment range.

Income

Earn from payment  
Transaction services & matching businesses

This expansion has three basic principles: (1) Some customers like to have the help from service counter to purchase discount tickets offline. (2) Some customers are also willing to obtain discounts through the smart sales/payment system. (3) Some customers think that the payment platform can be pre-ordered to obtain lower payment for trading. These platforms can better match the needs of all aspects of the market and enable VLT to gain more market share.

Milestone 2, 3

Milestone 2 :

VLT will strengthen its sales and marketing feedback program. Allows sales and marketing group to receive high discounts on purchase tickets.

Attracted

One-stop service and shopping directory, Allowing customers to enjoy cheaper prices and rebates

Income

Merchant Rebate

VLT will establish a substantial database through sales and marketing group to expand the convenience of getting discount on purchasing entry ticket. This compensates the current market for the use of offline sales promotions and sales operations. At present, Malaysia and most countries do not have a sales and marketing purchasing center database. Therefore, completing milestone 2 will provide customers with convenient, favorable sales and marketing support.

Milestone 3 :

At the moment, sales and marketing environment are very limited and regional. VLT will establish a global sales and marketing database for VLT buyers to connect with global operations and make sales and marketing more widely available. To overcome effective exhibitions on the global sales and marketing industry promotion database, VLT will hire sales and marketing consulting firms as well as legal firms entrusted to the country to let all the operations be legal and formal development. Through integrated marketing advertising packages designed specifically for sales and marketing to consistency, VLT will be the first and only international sales and marketing platform.

Buyers of cryptocurrencies must pay attention to the detailed description of sales and marketing rules. Smart contract technology will ensure that there is no reckless demand for potential sales and marketing, as both buyers and sellers must deposit a certain number of VLTs in order to make certain arrangements (such as sales and marketing credits or scheduled subscriptions).

Major Sales

VLT will be popular with its blockchain ticketing service. The founding of this service It is based on the following reasons:

- a) Traditional ticketing counter mode, messy and lack of integrity, tickets are easy to copy.
- b) High ticketing design and printing costs

This will allows the customer to purchased directly in digital currency, (via VLT wallet platform). Quickly and efficiently discriminate all tickets, classified areas with very low cost used.

**VLT blockchain Ticketing is an Important & new feature for the public**

With the promotion and sharing of VLT wallets, customers can benefit from payment discounts, which will promote business growth through sales and marketing rewards. This plan is an important and new function. It is worth noting that this process has already been announced by the relevant authorities within the legally acceptable scope.

# Expected Revenue

The funds raised by the ICO will be used to expand the business that VLT has successfully developed, and to add new free business lines. The forecast revenue (RM) in the coming years will include the breakdown of revenue sources from various lines of business. This is a conservative analysis of sales and marketing services and membership promotion revenues in Malaysia, as well as global VLT-ICO revenues after 2019 (ICO Foundation Year). VLT is happy to share details of assumptions and calculations used to forecast future income. If you want to learn more, please contact [admin@villiam.io](mailto:admin@villiam.io)

The goal of VLT is to become Malaysia's top tokens sales payment platform, while expanding to global market platform

- Distribution Before Pre Sale
- Distribution After Pre Sale

Token Distribution

B: Pre ICO Distribution 50% = 250,000,000 VLT

C: After ICO Distribution 50% = 250,000,000 VLT

Token & ICO Demand

As we mentioned before, VLT has strong financial support from early supporters. VLT will further expands its services to the world through the funds raised by ICO. The Fintech technology platform was established to reform existing sales and marketing payment models. Along with the economic benefits and applications of the cryptocurrency, the public and the community together with VLT established a common platform to expand their business and share their achievements through this ICO.

Sales and marketing is a global business. As mentioned earlier in this white paper, the release of VLT is an application token that can be used to pay for portal services to achieve higher penetration and wider usage. This is where initial subscribers create significant potential value growth on cryptocurrency platform.

- There are three main reasons:
- I. VLT's business model is feasible and successful
  - II. VLT is issuing at a significant discount to its value, which means that the value of VLT may increase significantly.
  - III. VLT blockchain technology is based on the ERC-20 smart contract framework, which is important in the field of cryptocurrency

# Blockchain Technology For ICO

Blockchain technology provides users and businesses with safe and smooth performance and added value.

Blockchain is a digital and distributed ledger technology in which transactions are decentralized nodes are stored by interconnecting each other via the internet. The stored information will be synchronized to all in real time Blockchain nodes, and can be seen by anyone.

## VLT uses blockchain technology to support ICO

VLT uses blockchain technology to validate and exchange data and process payment transaction services and rewards.

### Blockchain technology

Blockchain is a digital and distributed ledger technology in which transactions are stored through distributed nodes connected to each other over the Internet. The stored information is synchronized to all blockchain nodes in real time. Transparency, non-repudiation, and immutable records that anyone can view and audit.

## VLT Meets Standard Features of ERC20 Contract Deployment

### How Smart Contracts Work

A smart contract is a program or software that runs on the Ethereum blockchain. The program itself is recorded in the blockchain, with clear characteristics and behavior, transparent and unchangeable. Once deployed, the defined rules and logic will be digitized through smart contracts and blockchains without any third parties. As mentioned above, the transactions executed are traceable and irreversible.

### About ERC20

The ERC20 is a standard for publishing tokens on the Ethereum network. The ERC20 standard was developed to allow interoperability between tokens, wallets, and exchanges. By adhering to the ERC20 contract, VLT can automatically communicate with most cryptographic exchanges and wallets.

VILLIAM BLOCKCHAIN TOKEN

# Token Issuance

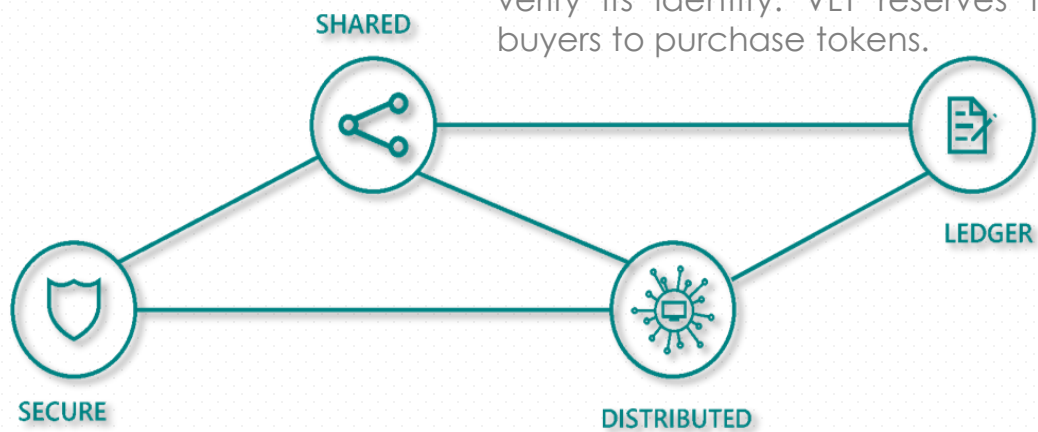

The VLT ICO website <http://villiam.io> was built by VLT for token sales. This is the official website. Information on token sales, such as the smart contract address for token sales, exchange rate, sales at the start and end dates of the plan, and the effective date of the token will be announced separately.

To participate in token sales, the public need to log in to <http://villiam.io> and they will need to register an account on the website. Once successfully registered, buyers will be able to use Ethereum to buy tokens.

The buyer-designated address must be a valid address on ERC-20 compatible wallet such as (VLT-Wallet) to receive token

The token sales smart contract address will be displayed to the participants, who must transfer the Ethereum directly from their own ERC-20 compatible wallet to the contract address. The VLT website will provide step-by-step guidance for buyers using VLT-wallet purchases. After successfully purchasing the token in Ethereum, it will be immediately posted to the address specified by the buyer. If you purchase in points or Ethereum, it will be issued within 15 days after the successful clearing of the posting and after the end of the token sales end date. The buyer-designated address must be a valid address on an ERC-20 compatible wallet such as (VLT-Wallet), the buyer must have a personal certificate as described at <http://villiam.io>, and the user may also need to provide additional information and Document to verify its identity. VLT reserves the right to refuse buyers to purchase tokens.

# Token Sales Overview

The token sales will be held in Malaysia on July 7, 2018, and will end on July 30, 2019 (the end of the token sales).

Sales process and distribution  
Buyers participating in token sales will can pay in the following coin:

For public sales, when we receive the Ethereum you paid, the token will be instantly transferred to your e-wallet. For the currency that is paid for private sale and public sale, the token will be after the end date of the token sale. Go to your Wallet within 15 days. The transferability of the token is governed by the applicable lock-up period (if any).

**50%** Before Pre-Sale

**50%** After Pre-Sale

The breakdown of token sales and marketing distribution is as follows:

VLT (Villiam Blockchain Token) promises to sell tokens in a transparent sales process. After the completion of the token sale, the public will be notified of the total amount of token circulation. After the sales period, VLT will never add any more tokens.

**VILLIAM BLOCKCHAIN TOKEN**

# Fund Allocation

## Fund allocation overview

The public will understand how the collection of fund proceeds from the sale of tokens to achieve the following three milestones of VLT. The diagram illustrates show how the proceeds will be distributed after the end of the sale:

### Development Fund (35%)

Establish a global database, through the VLT sales & marketing database that connect to the global business and future development in other areas, such as: real estate, overseas travel business, finance, etc., which will make VLT more widely spread. This can be achieved by co-branding and co-marketing activities with other companies.

### Marketing and Foundation (25%)

VLT will use 25% of the funds for active sales and marketing activities. Start in Asia and then go global. This is mainly to achieve brand awareness and product loyalty. At the same time, a special reserve fund has been set up to provide assistance to those in need. The company will also allocate a number of community service donations to the fund, including educational scholarships, so that we can help the younger generation achieve a better future.

### Advertising, promotion and international marketing (15%)

In order to expand successfully, the VLT team will need to collaborate and integrate with third-party service providers in different countries. This integration and collaboration will enable us to expand and replicate our successful business infrastructure to individual countries and entering new market.

### IT Development - Milestones 1, 2 and 3 (15%)

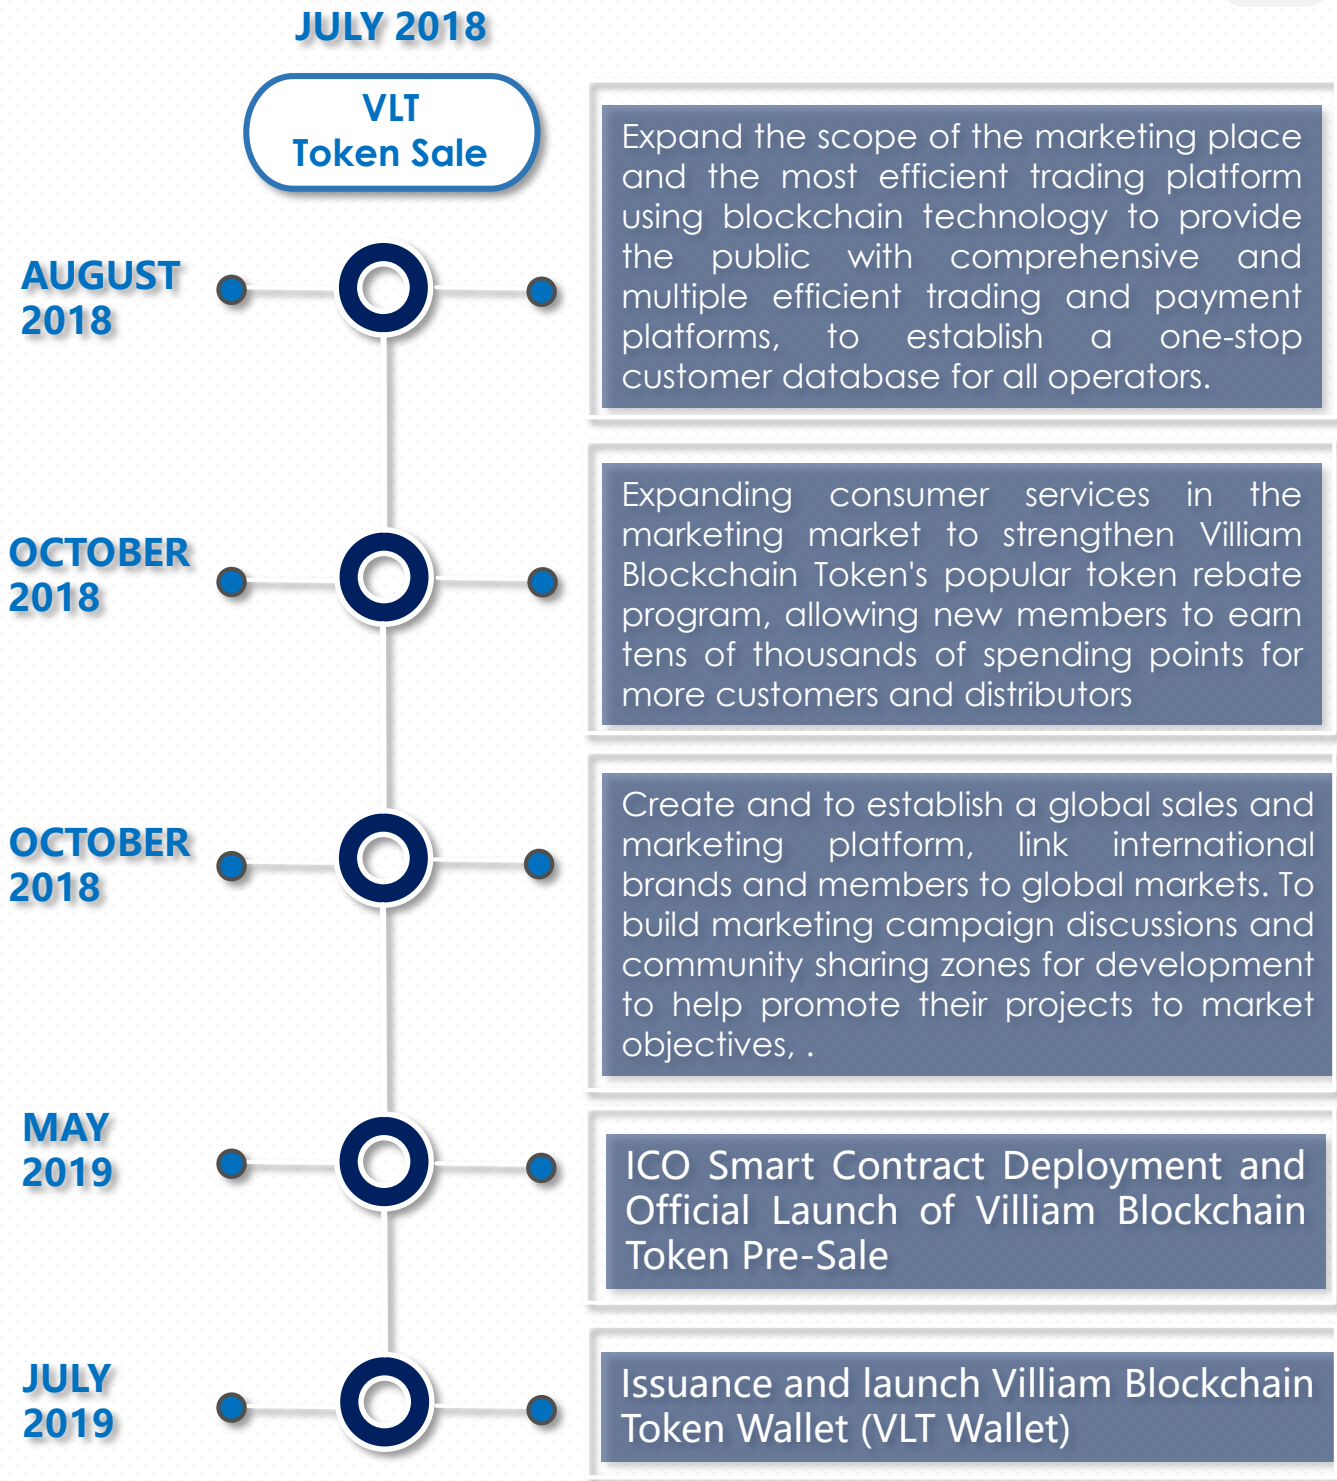

The core of the fund will be deployed in three milestones in VLT development and maintenance, providing consumers with the value-added services described while building platforms and generating revenue. VLT's strategy is to rapidly increase the user base and number of properties. The costs used here include planning manpower hardware and secure storage facility fees. VLT will continue to introduce new details and features, user interface, and support for Internet, iOS and Android users.

### Operation and management (10%)

VLT is operating a lean, cost-effective program and intends to continue to do so in the future. VLT will allocate funds for business expansion, accounting and administrative activities at the highest level of competition in the blockchain ecosystem.

Roadmap

Project Timeline

Development roadmap timeline

June 2018	Analysis and research of the ecological chain of encrypted digital currency
July 2018	Ready to develop Villiam Blockchain Token member back office system.
August 2018	Sales and marketing of tokens official website platform release
September 2018	Whitepaper preparation
October 2018	Smart contract deployment test
May 2019	ICO Smart Contract Deployment and Official Launch of Villiam Blockchain Token Pre-Sale
July 2019	Issuance and launch Villiam Blockchain Token Wallet (VLT Wallet)
July 2019	Official launch of trading platform for public sale

## Conclusion

25

Unlike many other ICOs, it is only about the future of products. But VLT is an existing, tangible business and reliable business model. This business is premised on sales and marketing and is the most valuable business category in the world. VLT is well prepared and capable of replacing the dominant position of traditional sales and marketing business models, and by shifting the operating market to Fintech's funds raised through the company, will be used to improve the VLT platform and incorporate through the listed milestones business Line.

We intend to build a strong real user database at VLT to maintain its competitiveness. VLT will commit to reserve 30% of all issued token to reward users. Users can use their VLT to pay.

A range of services offered by the VLT platform as VLT joins third-party service providers to put it in the platform, the number of services will increase.

For early adopters, VLT has great value growth potential. When referrals, sellers and buyers join the market, buyers who purchase VLT at significant discounts during the ICO phase will become the asset owners of Malaysia's premier platform. And gain value-added when VLT expands into the global market.
